

Project Title

Event Registration Portal

Project Domain

Web Application Development

Problem Statement

Managing event registrations manually is time-consuming and can lead to errors in maintaining participant records. Organizers often face difficulties in collecting registrations, updating event details, and tracking participants. An Event Registration Portal provides a digital solution that simplifies event management and registration processes.

Project Description

The Event Registration Portal is a web-based application designed to help users register for events online. The system allows users to create accounts, log in, browse available events, and register for them. Administrators can create, update, and delete events while monitoring participant registrations.

The application improves efficiency, reduces paperwork, and provides a centralized platform for event management.

Objectives

- Develop an online event registration system.
- Simplify the event registration process.
- Maintain participant records digitally.
- Enable administrators to manage events effectively.
- Provide a user-friendly interface.

Scope of the Project

The project can be used by:

- Colleges
- Educational Institutions
- Event Organizers
- Clubs and Associations
- It allows users to register for events from any device with internet access.

Modules

- User Module
- User Registration
- User Login
- View Events
- Register for Events
- View Registered Events
- Admin Module
- Admin Login
- Add Event
- Update Event
- Delete Event
- View Participants

Software Requirements

- Frontend: React.js
- Backend: Spring Boot
- Database: MySQL
- IDE: VS Code / IntelliJ IDEA
- Version Control: Git & GitHub

Hardware Requirements

- Processor: Intel i3 or above
- RAM: 4GB or above
- Storage: 20GB free space
- Database Design

Expected Output

- Users can register and log in.
- Users can view available events.
- Users can register for events.
- Administrators can manage events.
- Participant records are stored securely in the database.

Future Enhancements

- Email notifications
- QR Code-based event entry
- Online payment integration
- Attendance tracking
- Certificate generation

Conclusion

The Event Registration Portal provides an efficient and user-friendly solution for managing event registrations digitally. It reduces manual work, improves accuracy, and enhances the overall event management experience.
